

Every MSU package includes:

HD real-time video cameras with vari-focus lens and IR LEDs (up to 30 meters)

Mobile-ready IP based network connectivity

Real-time, UL-listed central station support

Mobile Surveillance Units:

Portable, customizable solutions for your security needs

Mobile Surveillance Units (MSUs) are complete end-to-end security solutions that can be deployed ad hoc in situations where people or property need protection.

ECAMSECURE's customizable MSUs are tactically designed to help you face the challenges of a rapidly changing world — without breaking your security budget.

Be ready for anything — anywhere, anytime.

When the unexpected happens, you need security solutions that can adapt to handle evolving conditions.

We developed our Mobile Surveillance Units with advanced customization and plug-and-play add-ons to create a comprehensive system that exceeds expectations — no matter what they may be.

- Four base model packages available, with more than twelve standard add-ons and customizations
- Full off-the-grid power capabilities on some MSU models
- Supported by configuration specialists who can help you identify an ideal setup

We offer custom configurations for all models. Our team can help you choose the right modifications and add-ons for your unique needs.

Mobile Surveillance Units: At a Glance

MSU Mini

Compact, mountable, affordable mobile surveillance.

Ideal for small/mid-sized businesses, the MSU Mini is a complete two-camera end-to-end security system in a small package. Optional solar panel available.

MSU Standard

An economical wireless unit ideal for securing small sites.

Perfect for covering smaller areas, the MSU Standard offers the same features as our top-of-the-line MSU Pro in a smaller two-camera configuration.

MSU Hybrid

Solar powered by day, with a battery bank for night.

The MSU Hybrid, our new highly flexible unit, can seamlessly switch between its integrated solar panel array and unlimited battery bank. If the battery bank isn't adequately charged due to lack of sunlight, the Hybrid can run off of its environmentally friendly diesel generator. Four cameras, no hardwired power source.

MSU Pro

Double the power capacity for more lights and cameras.

Highly customizable and conveniently mobile, the four-camera MSU Pro has larger solar panels than the Standard model, and can hold twice the charge. It's the perfect surveillance solution for keeping costs down without sacrificing security.

Find the security solution and configuration that's right for you.

Standard with every model:

- AXIS P1435-LE Network Camera
- Wireless connectivity
- Intelligent video analytics (IVA)
- Motion detection
- Strobe lights

We offer the following custom add-ons for all models:

- License plate recognition
- Thermal camera
- Pan/Tilt/Zoom (PTZ)
- Archiving & time-lapse services
- Monitoring services
- Two-way audio communication
- Multipurpose LED lighting array
- Sirens
