

Virtual Temperature Screening:

Contactless Elevated Temperature Alerts

Virtual Temperature Screening is a turnkey solution for detecting individuals with elevated body temperature in real time.

The proprietary ECAMSECURE contactless solution uses a combination of highly accurate thermographic IP cameras, software alerts, and plug-and-play hardware. This suite of hardware and software can be used to limit access to property and protect essential workers on the job.

Every thermal package includes:

High-accuracy thermographic camera

Dedicated video management system server

Real-time, UL-listed central station monitoring

Protect essential workers at checkpoints

Using Virtual Temperature Screening, businesses can be more discreet, efficient, and effective in identifying individuals with elevated body temperatures for further screening.

When used to support CDC-recommended best practices, this hardware can help safeguard public-facing workers in industries like healthcare and retail.

- No physical guard presence required
- No-touch elevated body temperature detection with a range of up to 23 feet
- Remotely restrict/limit access to persons with elevated body temperature
- Perfect for use at high-volume entry points

When added to thermographic camera systems, our automated gateway solutions quickly and accurately process personnel and visitors to provide 24/7 protection.

Improve Checkpoint Protection with Contactless Digital Temperature Screening

Our **Virtual Temperature Screening** solution uses software alerts and remote management capability to put you in the driver's seat when persons with elevated body temperature are identified.

ECAMSECURE can also integrate turnstiles into virtual temperature screening systems for facilities that need advanced access management. Contact us to learn more.

Solution can be customized to integrate with your existing video management system

Receive an email alert with visual documentation when an elevated temperature is detected

Manage alerts via desktop or mobile device with our easy to use graphical interface

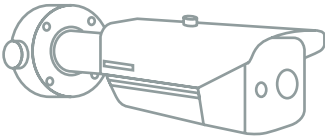

Packages available

Choose from four Virtual Temperature Screening solutions.

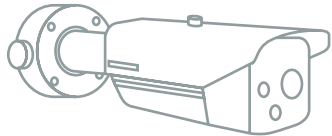

Want additional accuracy?

Blackbody add-on available for fixed cameras to achieve accuracy of $\pm 0.5^{\circ}\text{C}$ ($\pm 0.9^{\circ}\text{F}$)

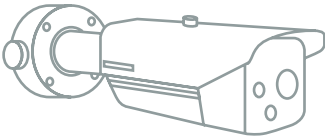

Disclaimer: Products depicted herein are not medical devices and are not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease, in man or other animals. When configured correctly, the products discussed herein can identify individuals showing higher than average skin temperature relative to a sample population.

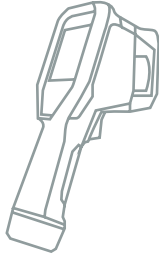

Fixed – Long Range (8.2-23ft)

Fixed – Mid Range (4.9-9.8ft)

Fixed – Short Range (2.6-4.9ft)

Handheld – Short Range (3.3-6.6ft)
